

COLIN CAMPBELL

WEB DEVELOPER

EDUCATION

- Bachelor's in Arts and Technology (ATEC)**
The University of Texas at Dallas
Resident in the Computer Science Living Learning Community; completed two years of CS coursework before pursuing ATEC. Ran web operations for the Student Game Dev Alliance.

EXPERIENCE

- Web Developer**
The University of Texas at Dallas
Richardson, TX
Javascript Drupal WordPress Docker
Worked with the ArtSciLab team to build Arteca - an online art, science, and technology community. Improved the team's workflow by creating an automated content import tool that replaced a previously manual process, saving the team many hours of work.
- iOS Developer**
Bottle Rocket Studios
Addison, TX
Objective-C iOS
Intern on the development team for streaming video platform AWE, which powers apps like Syfy and NBC. Received a contract for continued work after completing the internship.

PROJECTS

- barOwned**
Information Security Tool | barcowned.com
Javascript
The tool takes advantage of the way barcode scanners work (essentially as keyboards) to demonstrate how one might gain access to a system otherwise thought to be secure.
- nginx-config**
Web Server Configurations | github.com/colin-c/nginx-config
NGINX
My published configuration files for the popular NGINX web server, tuned for performance and security. Released into the public domain for anyone to use.
- WorkforceAlpha**
Backend API
Laravel PHP
System utilizing BLE beacons to track and optimize industrial workflows. Worked with the [Jump Space Apps](#) team building a backend to power the web and mobile apps.

AWARDS

- FinanSir**
First Place Winner | Capital One Coding for Good Hackathon
Laravel PHP

Our team (Justin Ehlert, Alex Gwyn, Nelson LeDuc) created an app giving insight into spending habits. I created the backend API. The judges, inc. Steve Wozniak, awarded our app first place.

I believe in the power of small details to make or break an experience, even if they're rarely noticed.
